POYNTON POOL SPILLWAY IMPROVEMENTS

PROPOSED CREST RAISING FOR FRIENDS OF POYNTON POOL OPTION 1D

Lidar scans of existing footpath overlaid with a 3D model of the raised footpath and 1:4 slope to the west, illustrating the interface between the proposed footpath and 1:4 slope with adjacent trees.

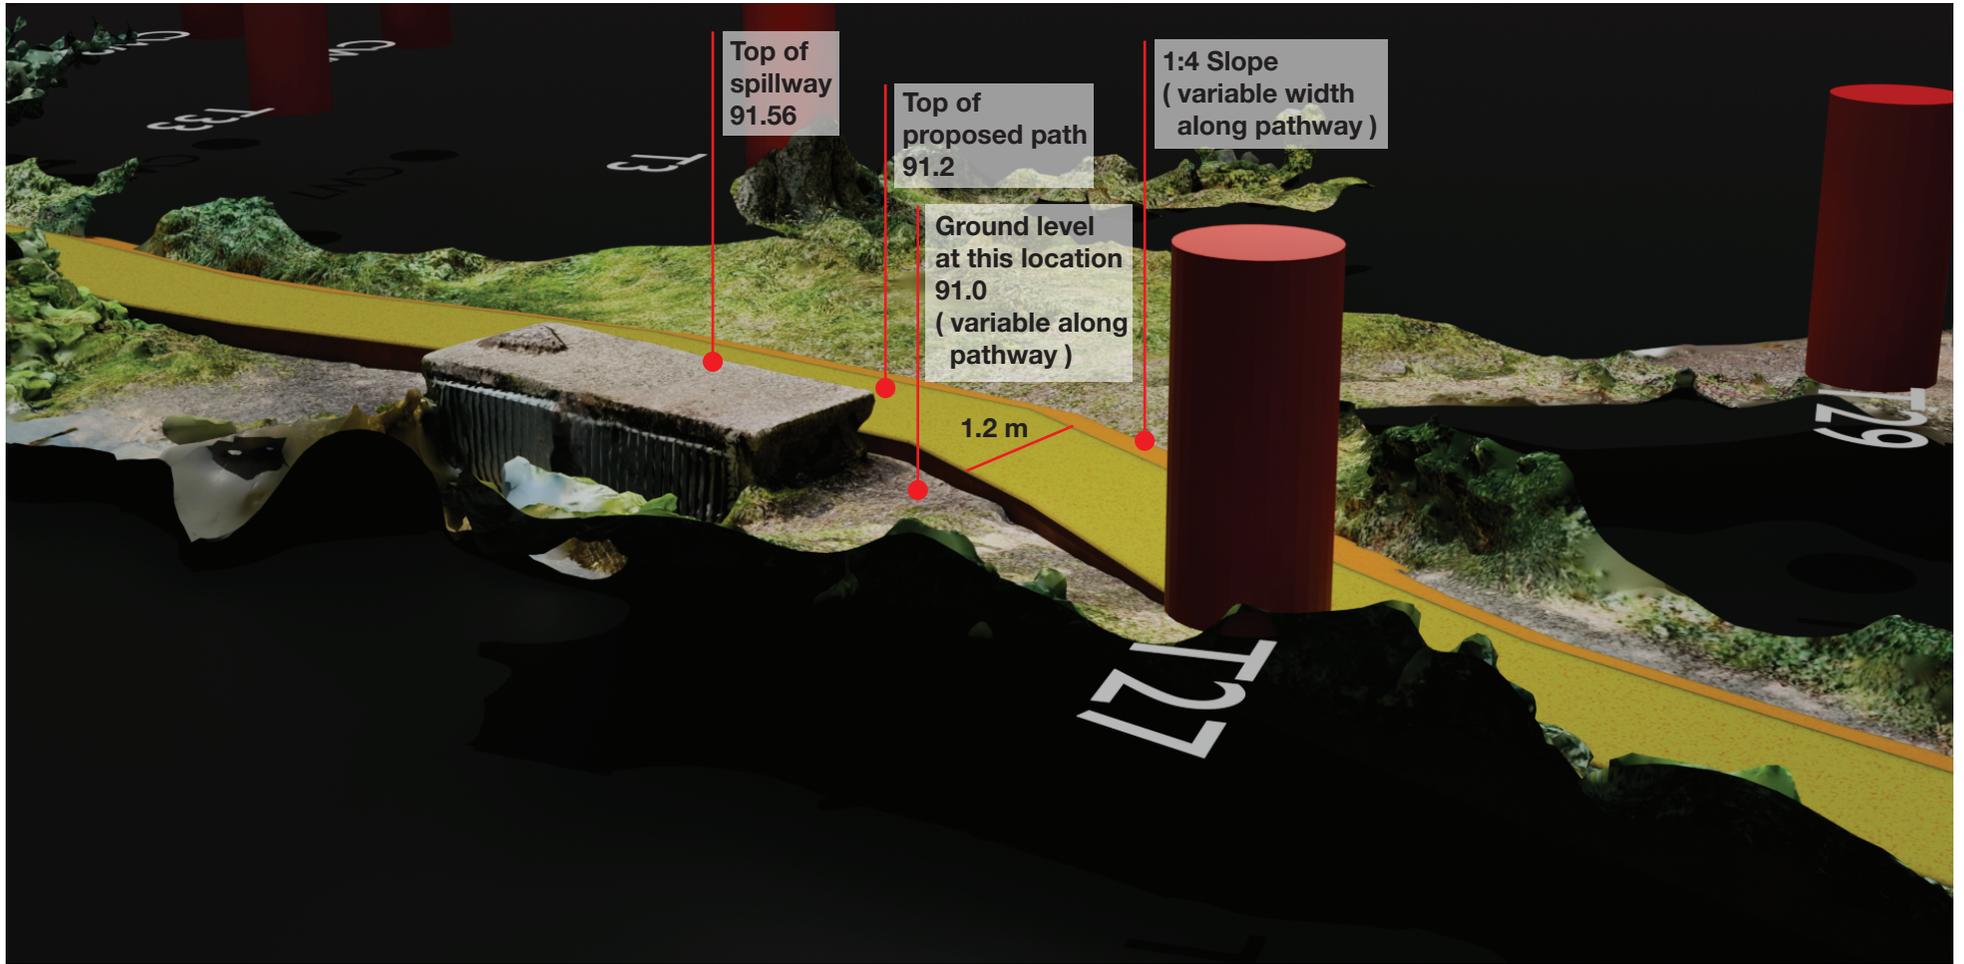

Upslope face to be retained where necessary by a wave-boards or the Flex MSE earth bag retaining system or similar.

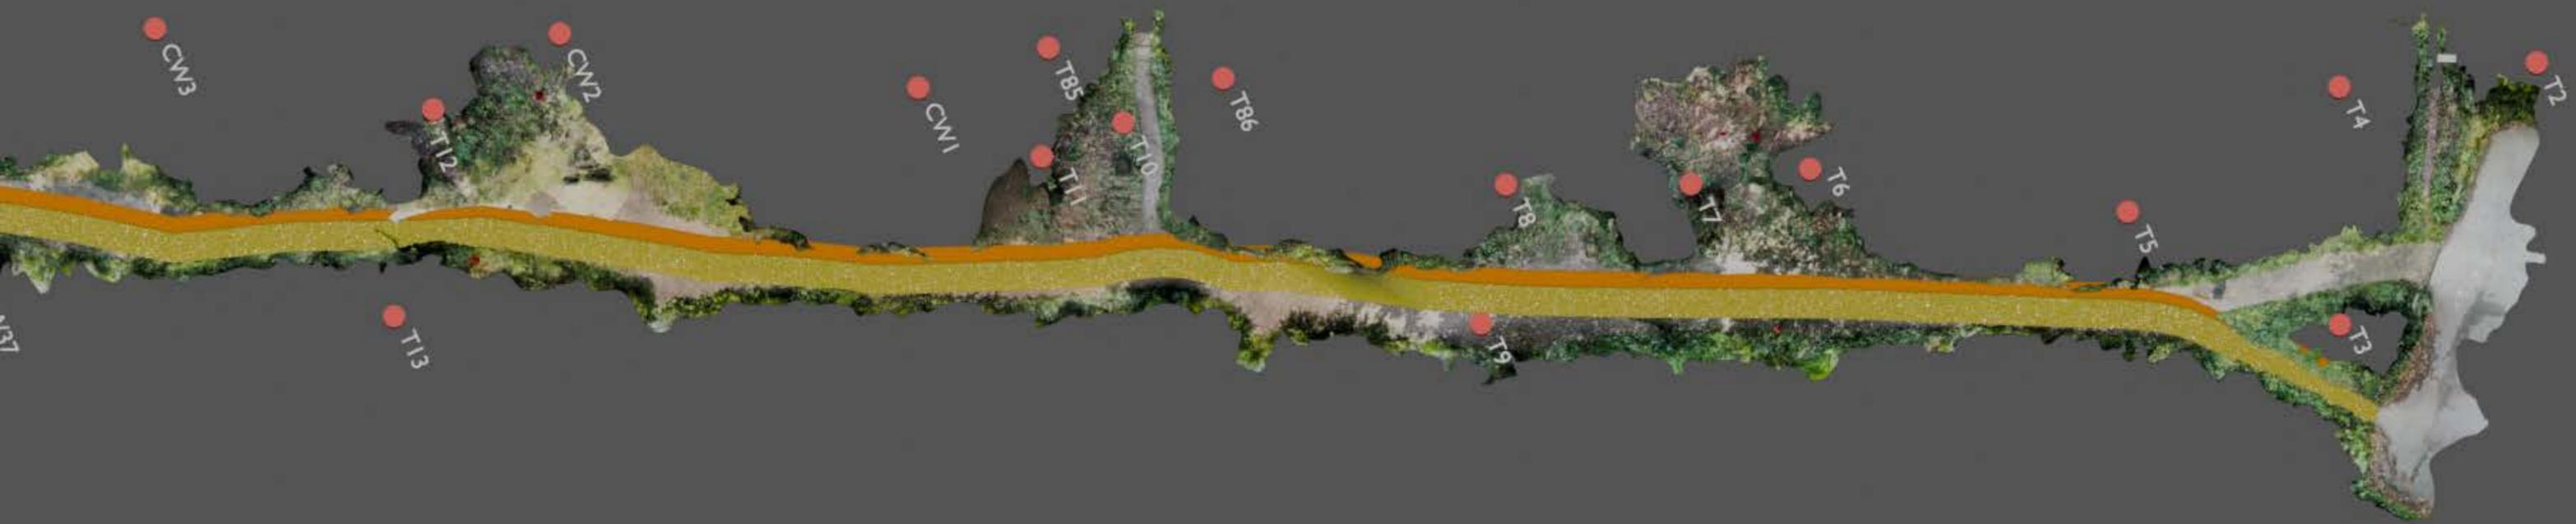

Organic material to be carefully removed using hand held Airspade® excavations and vacuum removal of arisings.

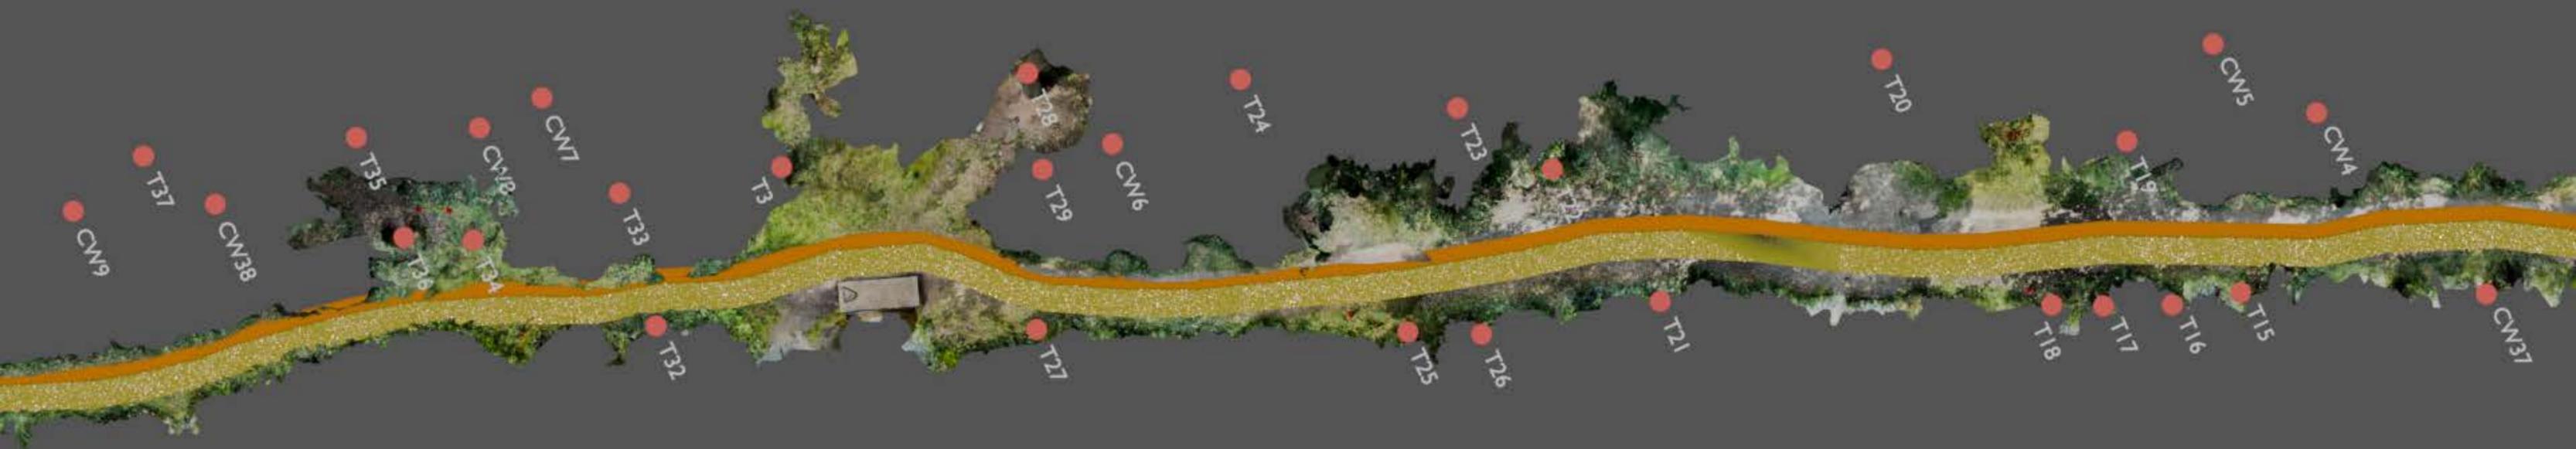

OPTION 1. Footpath top height at 91.20

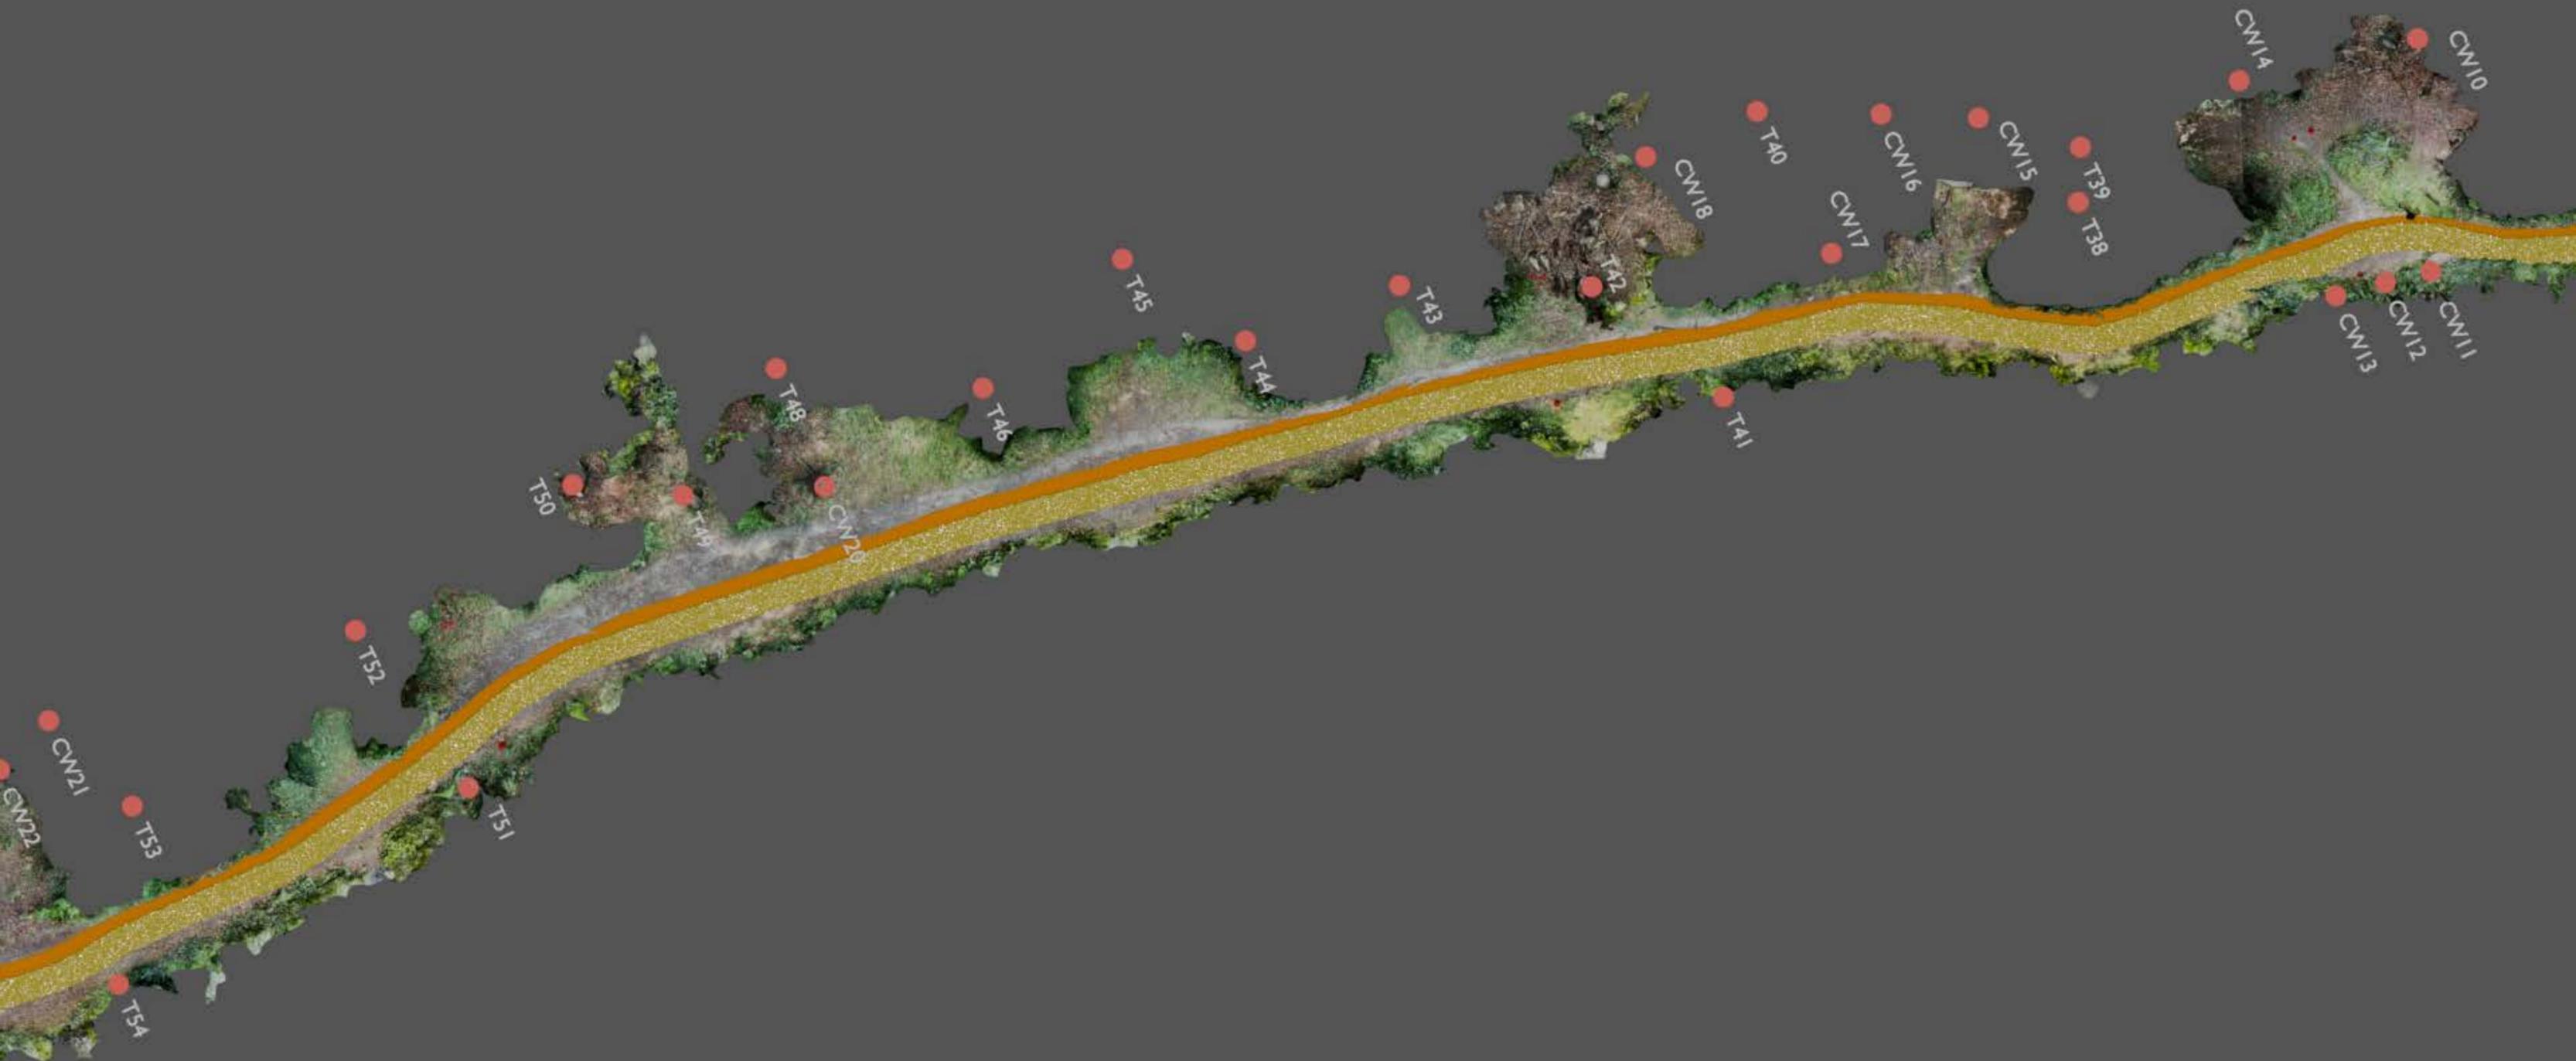

OPTION 2. Footpath surface height at 91.40

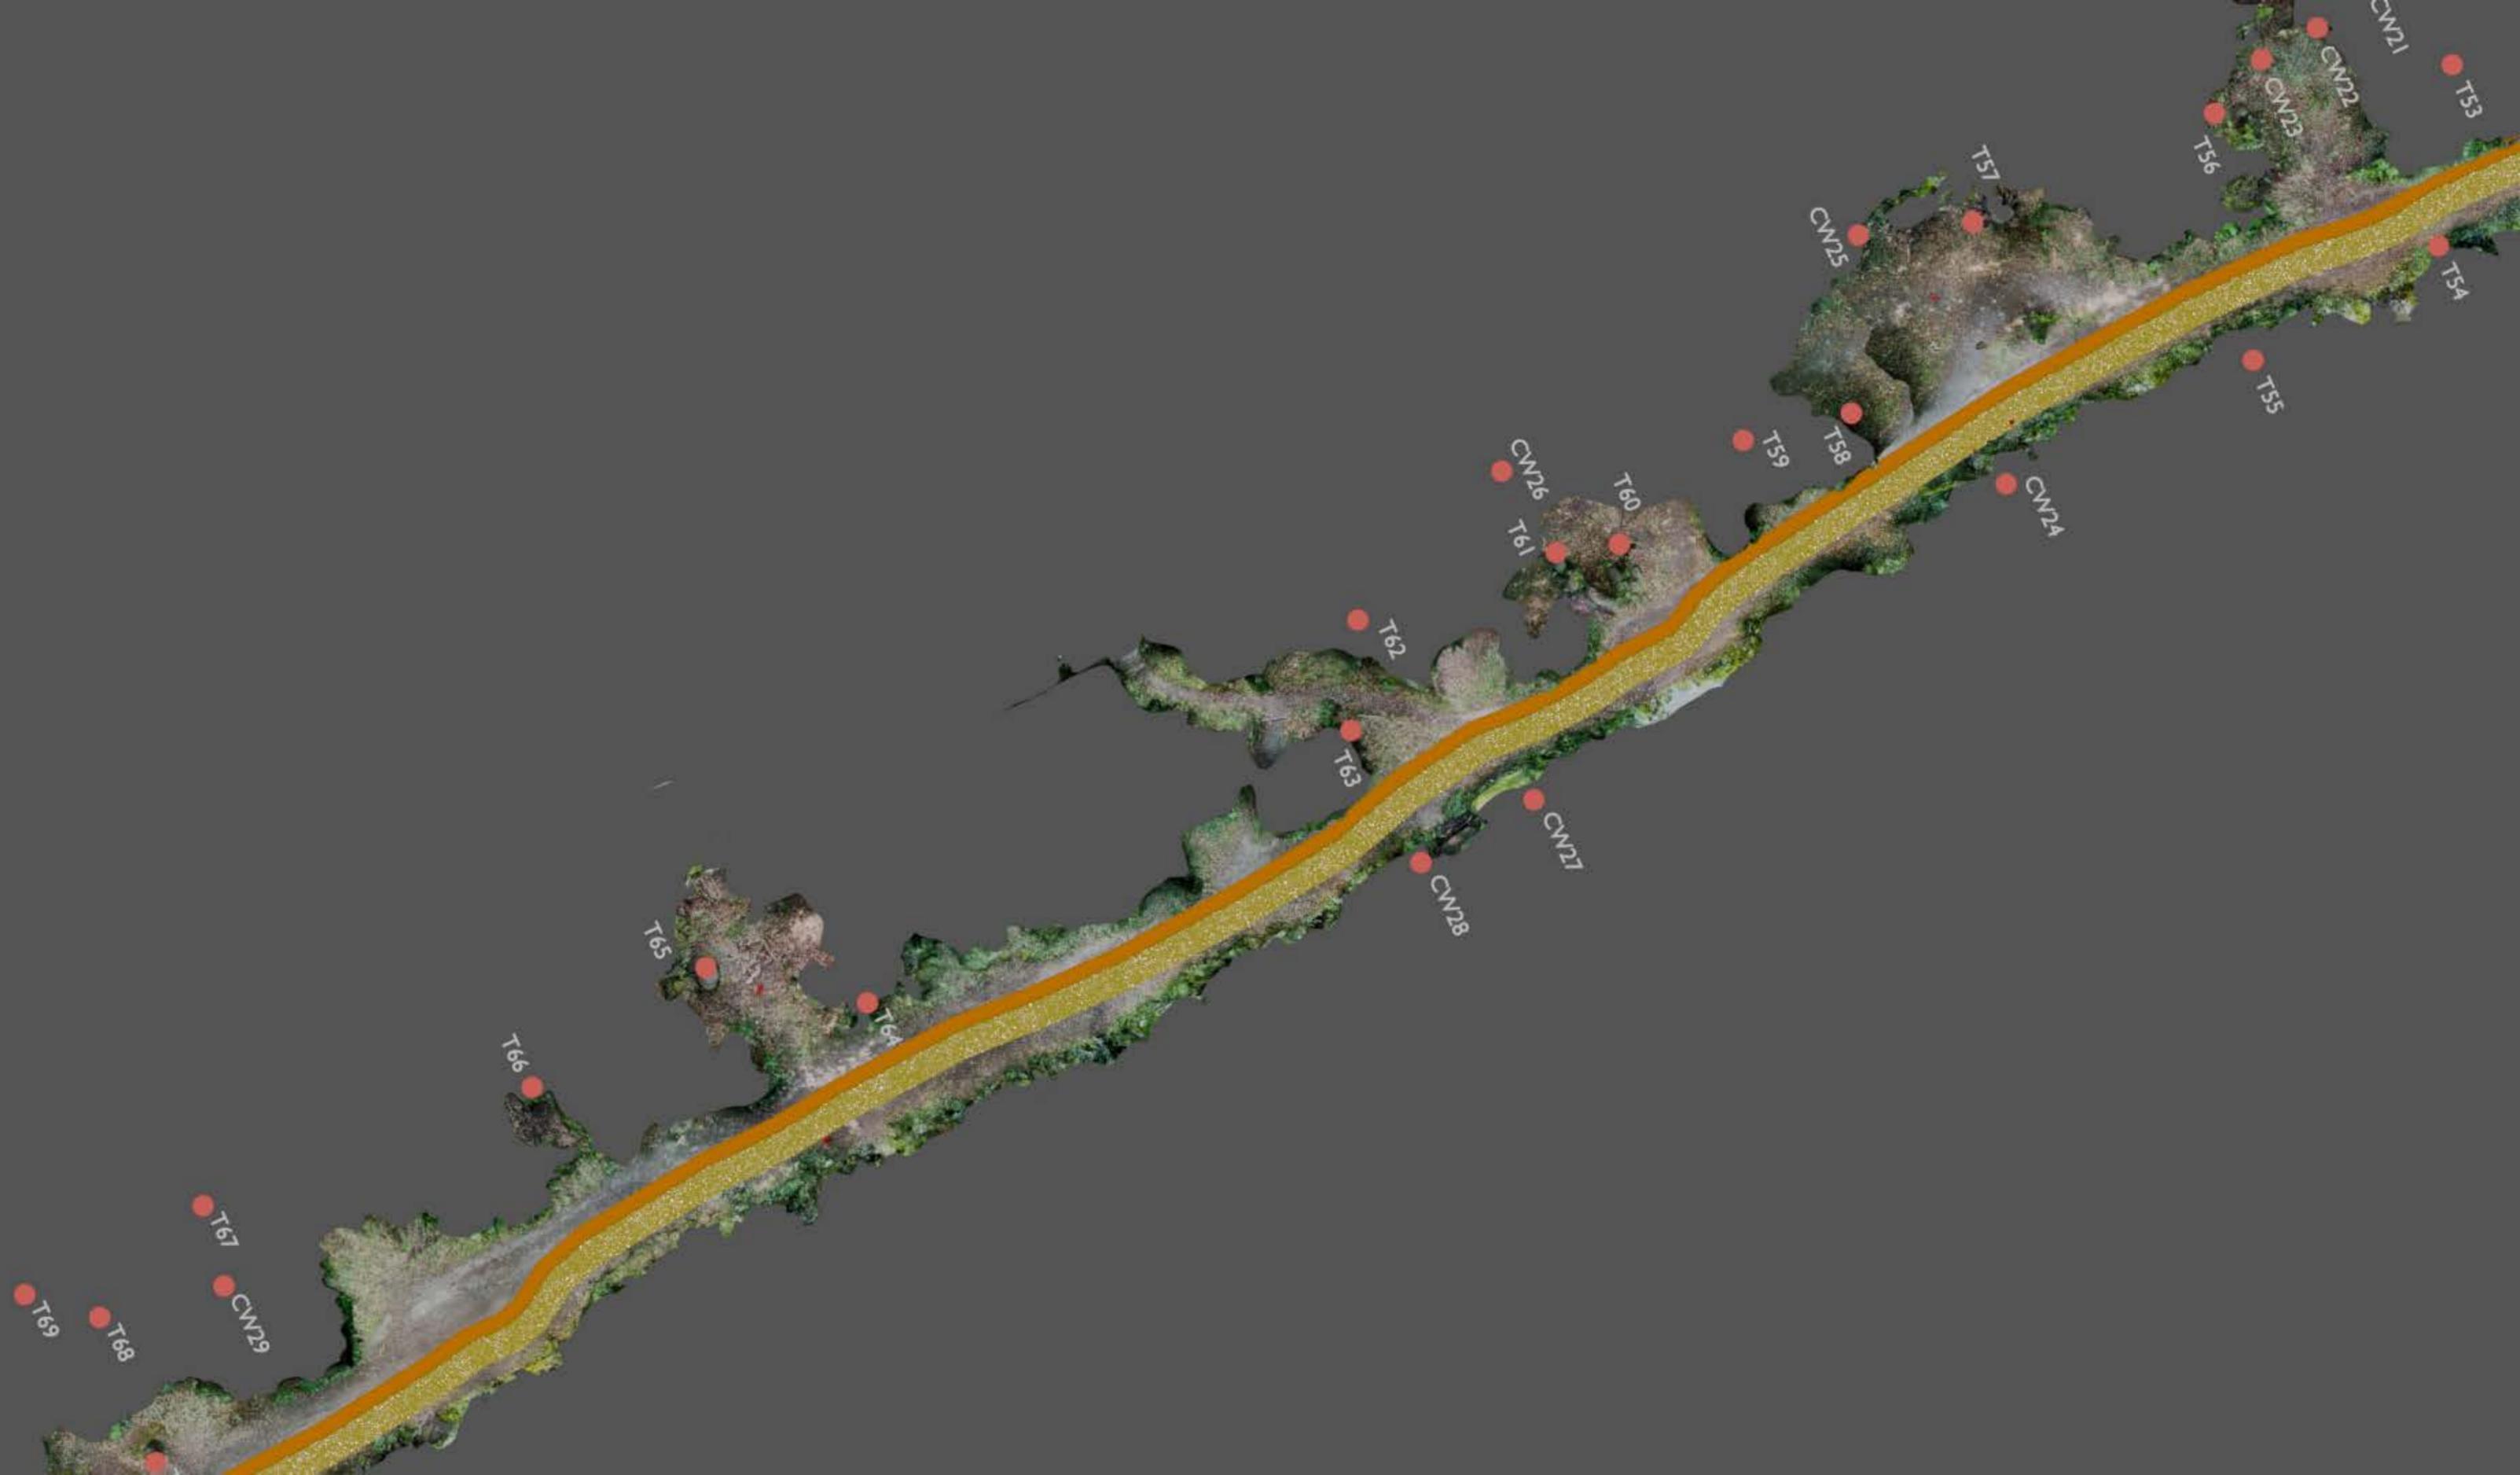

OPTION 1

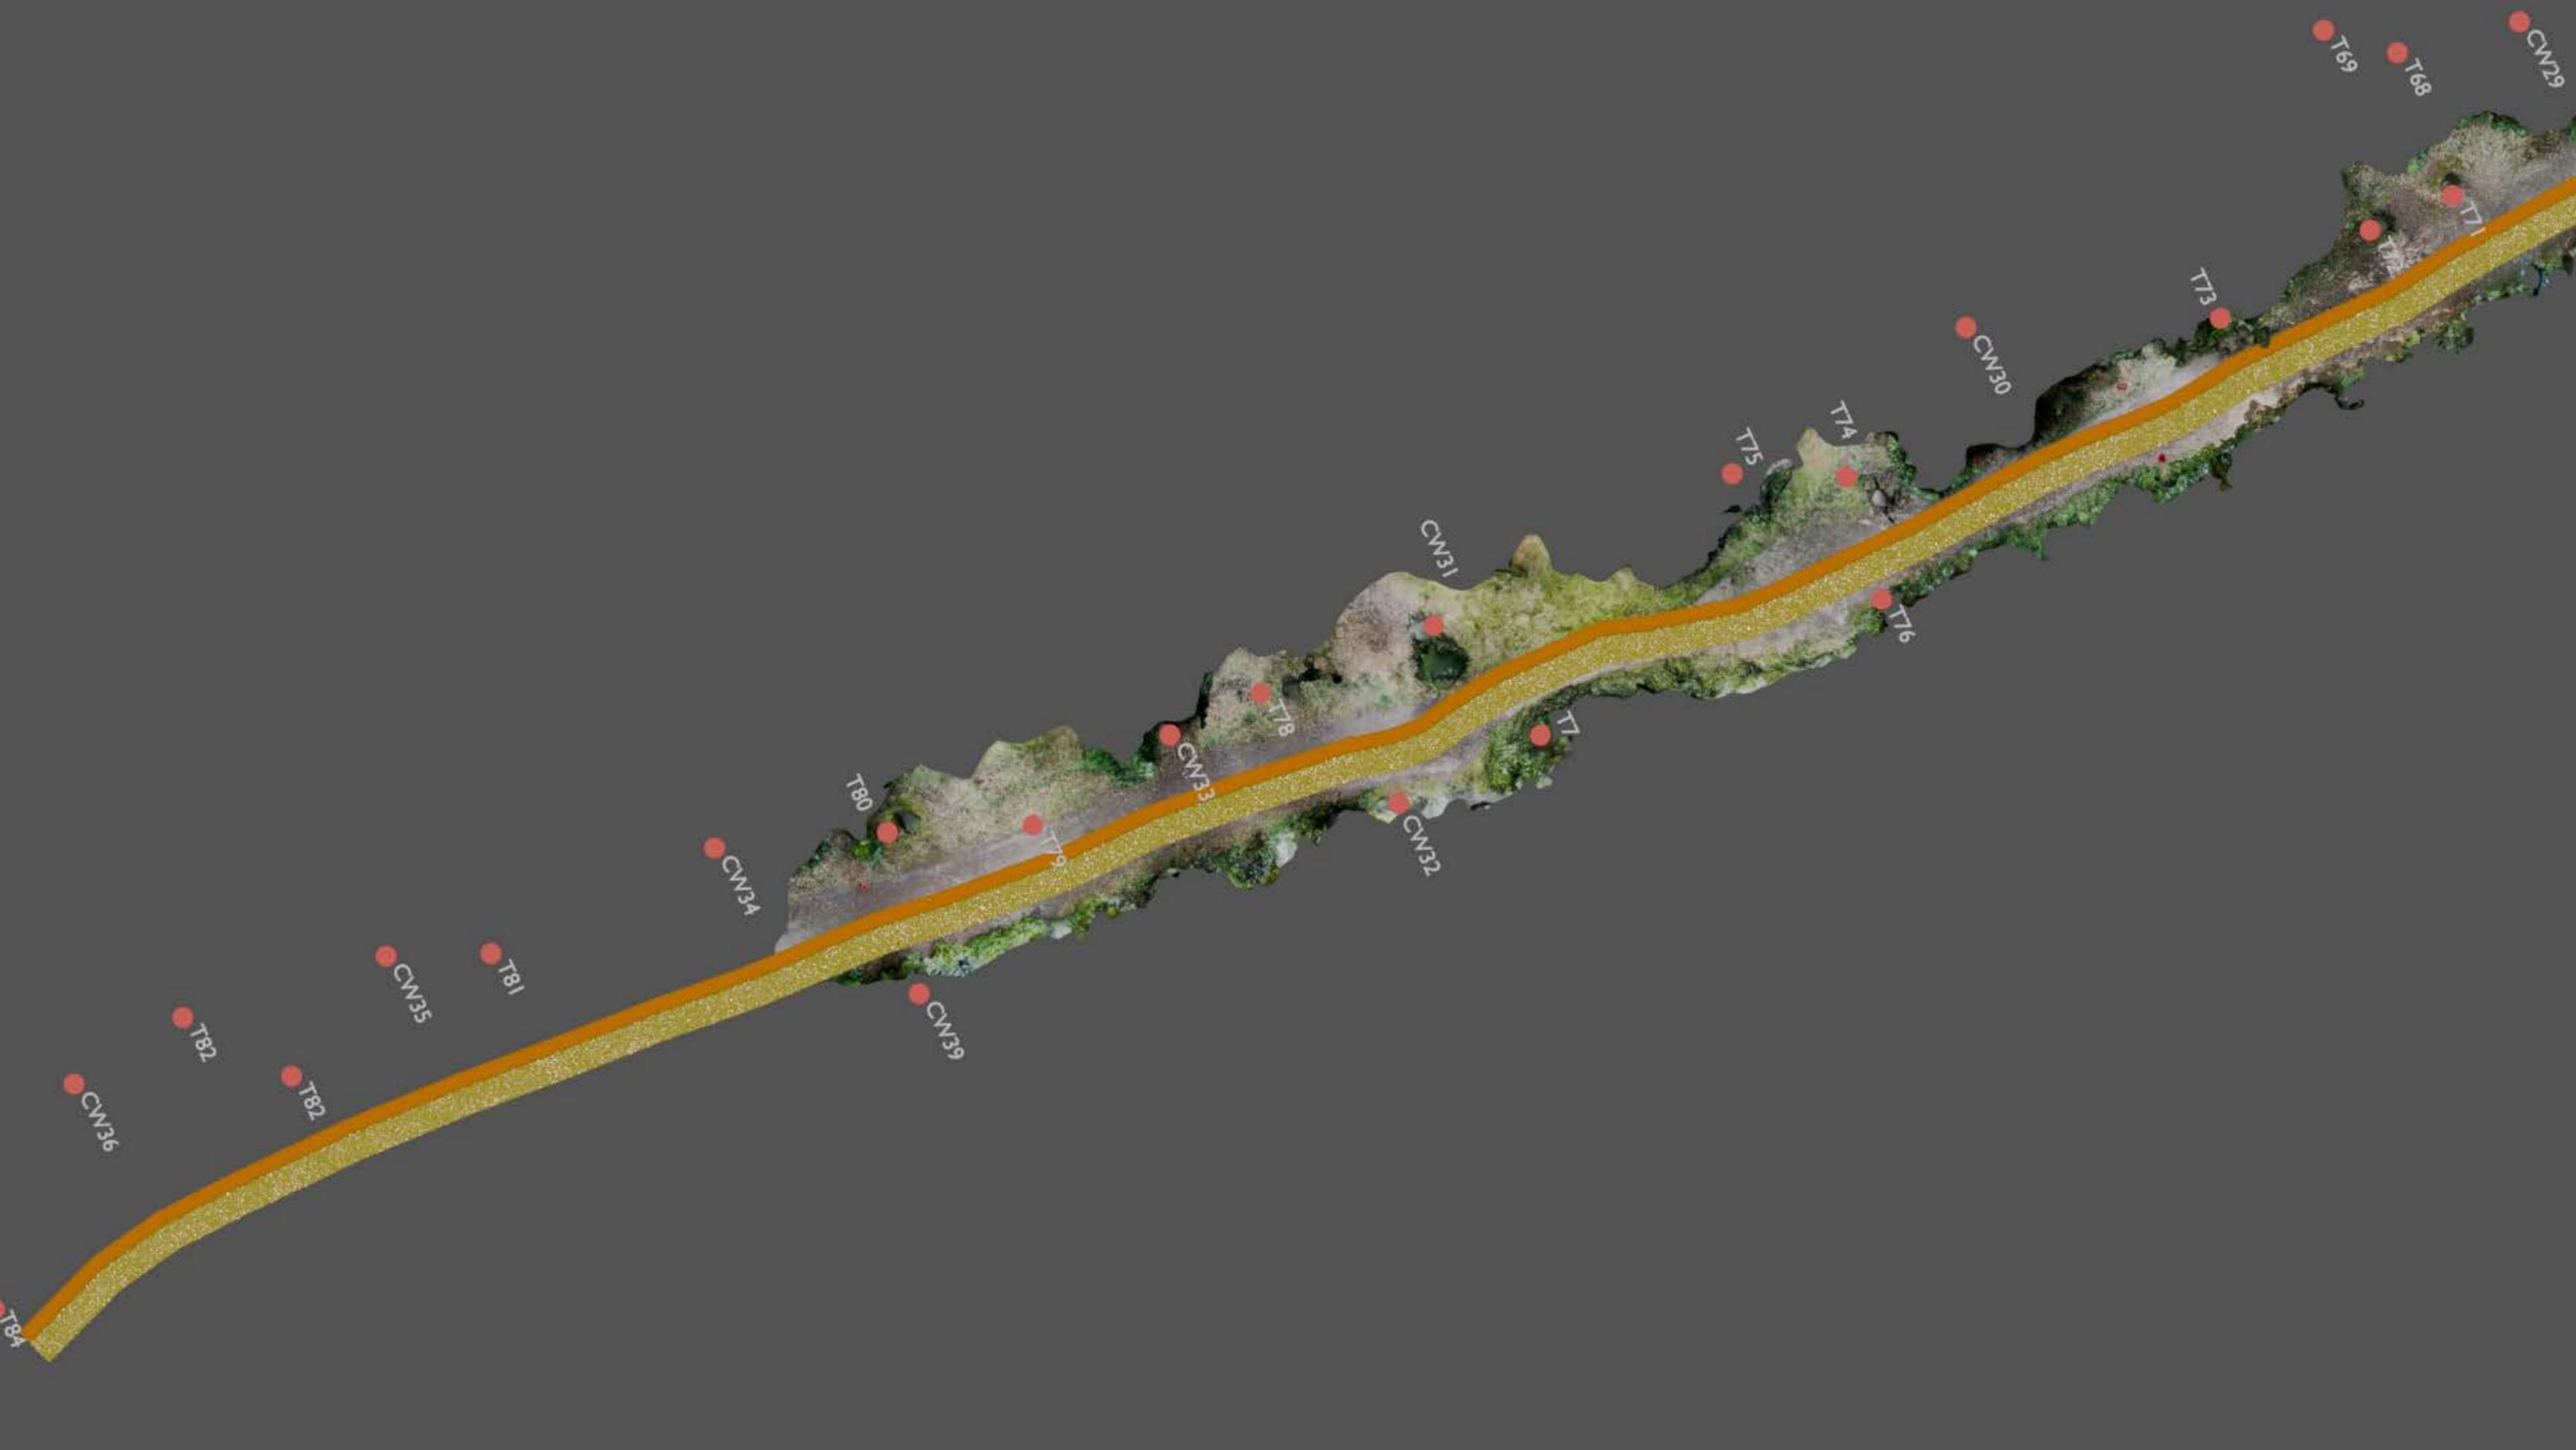

OPTION 2
